

```
void twosum  
(float a, float b, ...)  
{  
    float x = a + b  
    float z = x - a  
    ...  
}
```

C Code

```
twoSum:  
    %1 = load float*, %a  
    %2 = load float*, %b  
    %3 = fadd %1, %2  
    store float %3, float* %x  
    %4 = load float*, %x  
    %5 = load float*, %a  
    %6 = fsub %1, %2  
    store float %6, float* %z
```

IR

```
name   : x  
type   : float  
function: twoSum  
file    : twoSum.c  
line    : 4  
  
name   : z  
type   : float  
function: twoSum  
file    : twoSum.c  
line    : 5
```

Debug Info

```
twoSum:  
    %1 = load float*, %a  
    %2 = load float*, %b  
    %3 = fadd %1, %2  
    store float %3, float* %x  
    veritracer_probe(%3, x, ...)  
    %4 = load float*, %a  
    %5 = load float*, %b  
    %6 = fsub %4, %5  
    store float %6, float* %x  
    veritracer_probe(%6, x, ...)
```
